

No 1: System mesophilic/thermophilic flow

No 2: System mesophilic/thermophilic flow, with sanitation AFTER digestion

No 3: System mesophilic/thermophilic flow, with sanitation BEFORE digestion

Sludge/sludge heat exchanger

Sludge/water heat exchanger

Port on heat exchanger / line

To use this flow chart, refer to the **corresponding data sheet** for calculations, type of heat exchanger and remarks for the systems.

Do note, that the flow charts only shows minimum equipment in relation to system/heat exchangers in question. For specific request, please do use the actual specific flow chart.
